Jan	5	Kevin KD6UTC
	12	Matt N3AR
	19	Ron K6RIN
	26	Matt KN6SEC

January 2025

ACS/ARES Corner

Frank Valdez KI6OQ is the Area 1 Emergency Coordinator

We are always looking for ACS members that would like to become Net Controllers. You will receive hands-on training at the Simi Valley PD (where we normally conduct the Weekly Net). It is both fun and at times challenging. You will gain valuable experience in running a controlled Net as well as becoming more than just familiar with the equipment in the Radio Room at the PD. If you would like to volunteer for this, just message Frank Valdez at frankki6oq@gmail.com.

If anyone is interested in how to set up your own packet station, RMS Winlink station, or a Mesh Node, contact Frank, he will point you in the right direction.

The **Area 1** (Simi Valley) net occurs Tuesdays. Generally it is just a brief check in, but usually some news about upcoming events is passed on. **Stop by and say Hi.** You do not have to do anything other than check in to test out your simplex or repeater connection.

The **HF net** during summer months is on 7.242 +/- at **6:30 PM**.

Now during the winter, it is back to 3.987 lower side band.

The **simplex net** is on 145.510 at **6:45 PM**.

The **repeater net** is on the 146.805 (-, PL100) repeater at **7:00 PM**.

NOTE: Please be advised that we hold the Tuesday **countywide** net at 19:30 (7:30PM) on the Sulphur Mountain WD6EBY repeater 145.200, minus 600 KHz offset, CTCSS of 127.3. Until further notice, this will be our standard frequency for countywide communications.

Visit vccomm.org for more updates.

(ed - I send in my packet and winlink check in usually Sunday or Monday night. Leaves me free to do the voice check-ins with just a handheld while out and about.)

3D Prints by Eric KE6MLF

Joe W6JWP and I work together. He has acquired 2 filament printers and uses them to make all sorts of doo-hickeys and thing-a-ma-bobs. Here, for instance, is a printed shipping container for one of the products our company makes (an optical sensor):

January 2025

Here is a fun trinket in the “as printed” form, then assembled:

(That is Joe's boat next to the tiny antenna tower. All he could afford, spent all his money on radios.)

January 2025

I, of course, had endeavored to loftier pursuits (prints). Here is my monolith from the 2001 A Space Odyssey film:

January 2025

Really not quite as impressive as you would think, but still a fun movie “action figure”.

January 2025

Where is all this leading? Matt N3AR gave me a tiny 3d printed morse code paddle. If I add it to my other two, then I have a collection. (Got to have 3 or more of something to officially be called a "collection", right?)

Here are my Heathkit paddles (with integral keyer), Vibroplex Brass Racer, and the wee pocket paddle. I do not have a straight key, never used one.

January 2025

Humidity by Eric KE6MLF

I have a weather station at home. Built it over 20 years ago, been working fine since. It is connected to a Raspberry PI and provides simple weather data to a Mesh web page. Here is the weather PCB and display. Humidity says 44%.

January 2025

Meanwhile, I get these “VWR” things from work, showing time, temperature, and humidity. Rather than send them out for calibration every year, we just throw them in the recycle bin and get new ones. I grabbed two to have around the shack. Here are two sitting right next to the weather sensor. Humidity says 29%. **Argh?**

In reading up, the humidity sensors can drop in accuracy over time, if they were ever right in the first place. **Time to find a replacement for my weather station sensor.**

January 2025

Cable Winder by Eric KE6MLF

I have a sheet of "Kydex" plastic laying around. Finally got around to cutting it to size and made a wire winder for my small radio dipole. Took 10 minutes to cut it and clean up the edges. As I wound the wires and feedline, I could already see improvements. NOPE! It is the best winder I have ever made in my life!. Some times you just have to push the engineers to the side and start using the product.

Note: Most listings have been sitting around for quite a while, and so removed. If you wish to re-list, send the editor an email.

SSARC Marketplace

This section of the newsletter is for Simi Settler club members to post various used or previously owned items for sale that they may no longer have a need or use of. Please submit a brief description of the sale items (along with a photo if possible) and suggested price to Eric Oberg KE6MLF, the newsletter editor, at least two days before newsletter publication. It is suggested that a portion of each sale be donated to the SSARC treasury to help support the club's several activities. The term "OBO" means "Or Best Offer" and serves only as a starting point in negotiating a fair price.

.....

MFJ-335 MOBILE ANTENNA MAGNETIC MOUNT

This heavy-duty 5" diameter magnetic antenna mount uses a powerful 2.5 pound magnetic base for secure mounting on top of most vehicles. It features a standard 3/8-24 threaded receptacle for attaching various hamstick or other whip antennas as needed. The 9-1/2 ft. length of RG-58 cable has a standard PL-259 UHF end connector. Typical cost of this magnetic antenna mount from MFJ or DX Engineering is \$29.95.

Condition: Excellent Price: \$5 or OBO. Contact Mike Tweedy KV6I (805-231-9683)

January 2025

COMET CF-4160 DUPLEXER

The Comet CF-4160 is a 2m/70cm duplexer that can act as a splitter to provide separate VHF and UHF coax outputs that can feed separate 2m and 70cm antennas for dual band transceivers having a single coax output. Alternately, it can combine outputs from separate VHF/UHF rigs or a transceiver having separate VHF and UHF coax outputs that can be combined together to use a single coax cable that connects to a VHF/UHF antenna such as a MFJ-1760 or MFJ-1768 dual band Yagi. For low bands such as 2m, the frequency range is from 1.3 to 170 MHz. For high bands such as 70cm, the frequency range is 350 to 540 MHz. UHF-type coax connectors provided are a single female SO-239 and two male PL-259 connectors. The Comet CF-4160 duplexer currently sells for \$52.98 from GigaParts.

Condition: Excellent Price: \$5 or OBO. Contact Mike Tweedy KV6I (805-231-9683)

January 2025

PARA DYNAMICS PDC9 SWR & POWER METER

The Para Dynamics PDC9 inline SWR / Power Meter operates from 144MHz to 430MHz which includes the 2m - 70cm ham bands. The unit has two power ranges, 15W and 60W. Unit provides two female SO-239 coax connectors. Unit measures approximately 2" X 2.5" X 1". A similar unit recently sold on eHam.net for \$25.

Condition: Excellent Price: \$5 or OBO. Contact Mike Tweedy KV6I (805-231-9683)

January 2025

RADIO SHACK PRO-2044 SCANNER

The PRO-2044 is an 80-channel programmable scanner capable of receiving both AM and FM modulated signals in the HF, VHF and UHF bands ranging from 29 MHz to 512 MHz. The scanner's channels are divided into 10 channel-storage banks of 8 channels each. The scanner also has an additional 10 monitor memories available for temporary frequency storage if desired. The unit features keypad entry programming buttons plus standard volume and squelch controls to set desired audio level. The unit has a built-in internal speaker plus a headphone output jack. Power requirement is 12VDC with an AC adapter included. Rear antenna input is a BNC-type connector for connecting to an outdoor antenna or to a small collapsible whip (included). Size is 8" wide x 7" deep x 3" high. Instruction manual is included.

Condition: Very Good Price: \$10 or OBO. Contact Mike Tweedy KV6I (805-231-9683)

January 2025

REALISTIC PRO-42 SCANNER

The PRO-42 is a handheld 10-channel programmable scanner radio capable of receiving FM frequencies in three separate bands: 30 MHz to 54 MHz (VHF Low), 138 MHz to 174 MHz (VHF High) and 380 MHz to 512 MHz (UHF). The unit features keypad entry programming buttons plus standard volume and squelch controls to set desired audio level. The display is an LCD type with a backlit display for improved readability in low-light conditions. It includes a channel lockout capability with an optional 2-second scan delay to eliminate missed replies. The unit has a built-in internal speaker plus a headphone output jack. Antenna input is a BNC-type connector for connecting to an 8-inch flexible antenna (included) or an outdoor antenna if desired. Power (9VDC) is provided by six internal AA batteries or via an external power jack. A separate charger input is also provided should rechargeable 1.25 volt nickel-cadmium batteries be used instead. A convenient belt clip is also provided for ease of use.

Dimensions are 6.75" tall x 2.75" wide x 1.50" deep. Weight is 15.9 Oz.

Condition: Very Good Price: \$5 or OBO. Contact Mike Tweedy KV6I (805-231-9683)

January 2025

LAFAYETTE RADIO MODEL TE-50 TUBE TESTER

This portable tube tester from Lafayette Radio is perfect for testing vacuum tubes from classic radios and television receivers sold back in the day. It has eight tube sockets capable of testing standard Octal, Loctal, 7-pin miniature, 9-pin miniature types as well as well as 9- and 12-pin Compactron tubes and nuvistor tubes that were popular back in the 1950's and 1960's. Tests include leakage, shorts and tube emission (e.g.- gain or μ -measurements). The tester includes a slide-out chart drawer plus supplemental charts for newer-type tubes listing the required selector switch and slide switch settings for each tube under test including a test clip for testing tubes with high-voltage anode top caps such as those used for horizontal sweep circuits of earlier televisions. Similar Lafayette Model TE-50 Tube Testers are listed on E-Bay for \$99.99 or more.

Condition: Very Good Price: \$5 or OBO. Contact Mike Tweedy KV6I (805-231-9683)

RADIO SHACK MODEL 15-1244 RF MODULATOR

This Radio Shack RF modulator can provide an NTSC type RF signal to older TVs or video monitors that require an analog signal as an input. The output is user-selectable for either channel 3 or channel 4 output and can provide 75 ohm or 1k ohm impedance. Input is AV video/video using standard phono-type plug cables. An RF coax jumper cable is provided.

Condition: Excellent Price: FREE! Contact Mike Tweedy KV6I (805-231-9683)

January 2025

EDSYN MODEL CL1481 SOLDER STATION

This solder station contains a 30 watt soldering iron, a soldering iron holder, a cleaning sponge and 4 different types of interchangeable soldering tips. Unit was originally won as a raffle prize and never used, but has been tested to work OK.

Condition: Excellent Price: \$10 or OBO. Contact Mike Tweedy KV6I (805-231-9683)
